

Serving as Pilot without a Co-pilot? - Develop Single Pilot Crew Resource Management Skills

SRM is the art of managing all the resources (both on-board the aircraft and from outside sources) available to a pilot prior to and during flight to ensure a successful flight. SRM includes the concepts of aeronautical decision-making, risk management, controlled flight into terrain awareness, and situational awareness. Join us to refresh and improve your pilot skills to maintain situational awareness by managing automation, associated aircraft control, and navigation tasks.

Directions: Proceed to Fernando Luis Ribas Dominicci Airport at Isla Gande, PR. Take the main road toward the PR Ports Authority passenger terminal. Continue past the terminal and the ATC control tower to the Interamerican University Aeronautical Building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
